

The system performs statistical analysis using Python and leverages an LLM to convert structured data into human-readable insights.

Step:- 1

System Architecture:-

1. Financial Data (CSV files)
2. Python Data Processing (Pandas + Statistics)
3. LLM Explanation Layer (Groq LLaMA Model)

Step:- 2

Work-Flow

Load Data
Parse Portfolio Lists
Year-wise Processing
MCap Filtering
Sector Exposure Constraint
Save New Portfolio
Generate AI Explanation

Step:- 3

LLM Prompt

You can see the prompt in python file itself

Step:- 4

Execution

1. Groq api key in [LLM.py](#)
2. Run [main.py](#) and [LLM.py](#)
